RING-TAILED LEMUR

Lemur catta · Dry forest and scrub — southern Madagascar
Mixed primate · Wild-range diet

3-SECOND CHECK Do I see fruit, greens, AND chow / browse — all present?

THE RULE What they would naturally come across in their wild range, by percentage of natural diet. Nothing else.
Dry forest and scrub — tamarind dominates (≈50%); leaves, flowers, fruit, bark supplement.

≈90% BASE always visible in the bowl

≈10% TREATS hand-fed or scattered — never in the bowl

BASE
Tamarind
fruit and leaves — ≈50% of wild diet

TREAT
Mixed leaves
browse from many species

TREAT
Ripe fruit
seasonal canopy fruit

TREAT
Flowers
wild blooms

TREAT
Bark & sap
dry-season fallback

Plus other plants and prey from their wild range — pesticide-free only.

NO ORANGES, NO ROMAINE No oranges, no citrus, no romaine-heavy bowls. Three zones — fruit, greens, chow — all visible.

HOW WE FEED

- Base must be visible in the bowl.
- Treats are hand-fed or scattered, never in the bowl.
- Baseline before guest hours — do not feed to fullness before guests arrive.
- All items pesticide- and herbicide-free.

MATCH THE BOWL — DON'T INTERPRET.

If unsure: Pause → Ask → Escalate. No substitutions without approval.

What a living thing can sense becomes its reality. Environment shapes design.
