## MEET THE SLOTH

**Scan to meet this animal.**

**TAKE IT HOME**
Ask it anything.

**BACK · Pocket spine (5 of 8 — identical wording; AI covers all 8)**

## LINNAEUS'S TWO-TOED SLOTH

**A slow-moving mammal that lives in rainforest trees.**

1. **What can it see, hear, or feel?** Sharp hearing picks up tree movement, a keen nose finds food, and claws feel every branch firmly.
2. **Where does it live — and why?** It lives high in the rainforest, hanging upside down, with green algae in its fur as camouflage.
3. **How does it send messages?** It is mostly silent, but hisses when threatened, slashes with its claws, and stays still to hide.
4. **How does it learn?** A young sloth clings to its mother for up to a year and learns which leaves to eat.
5. **What does this teach us?** Being slow and still is a real survival plan, not weakness — it fits the whole forest.

**LOOK AT THE ANIMAL: What do you see it doing right now?**

**What a living thing can sense becomes its reality.**
Environment shapes design. · life.family-fun-group.com/sloth

**Structure rule: identical wording to Student Totem. No new questions. AI covers all 8.**

On first scan: Lehi the Giraffe greets the guest, then asks age. Under 13 → locked 8-question rail. 13+ → Alpha/Omega naturalist tier.
