ARGENTINE TEGU

Salvator merianae · Savanna and forest edge — South America
Omnivore · Wild-range diet

3-SECOND CHECK Do I see protein — visible in the bowl?

THE RULE What they would naturally come across in their wild range, by percentage of natural diet. Nothing else.
Savanna and forest edge — invertebrates and small prey are primary; fruit and eggs supplement seasonally.

≈90% BASE always visible in the bowl

≈10% TREATS hand-fed or scattered — never in the bowl

BASE
Insects & small prey
primary protein

TREAT
Eggs
ground-nest opportunism

TREAT
Small prey
feeder rodents, fish

TREAT
Ripe fruit
seasonal supplement

TREAT
Wild berries
seasonal forage

Plus other plants and prey from their wild range — pesticide-free only.

NO LIVE PREY BY GENERAL STAFF No live prey handled by general staff. Protein must be clearly visible — no greens-or-fruit-only bowl.

HOW WE FEED

- Base must be visible in the bowl.
- Treats are hand-fed or scattered, never in the bowl.
- Baseline before guest hours — do not feed to fullness before guests arrive.
- All items pesticide- and herbicide-free.

MATCH THE BOWL — DON'T INTERPRET.

If unsure: Pause → Ask → Escalate. No substitutions without approval.

What a living thing can sense becomes its reality. Environment shapes design.
