RED-FOOT TORTOISE

Chelonoidis carbonarius · Forest edges and savannahs of northern South America
Forest omnivore · Fruit-dominant · Wild-range diet

3-SECOND CHECK Do I see fruit + greens + a trace of protein?

THE RULE Forest-edge tortoise. More fruit than greens. Trace animal protein WEEKLY.
Northern South America forest edge — fallen tropical fruit, leafy greens, slow invertebrates.

≈55% BASE Fruit-dominant, with greens

≈10% TREATS Animal protein, once per week only

BASE 55%
Papaya, mango
tropical fruits

BASE
Berries, melon
soft sweet fruits

GREENS 35%
Collard, dandelion
rotated greens

GREENS
Hibiscus
wild forage

PROTEIN 10%
Earthworm, egg
weekly only

Plus other plants and prey from their wild range — pesticide-free only.

TABOO No citrus. No dog food. No daily protein. No iceberg lettuce. No grass-only diet.

HOW WE FEED

- Base must be visible in the bowl. Treats hand-fed or scattered, never in the bowl.
- Animal protein once per week ONLY — never daily.
- Baseline before guest hours — do not feed to fullness before guests arrive.
- All items pesticide- and herbicide-free.

MATCH THE BOWL — DON'T INTERPRET.

If unsure: Pause → Ask → Escalate. No substitutions without approval.

What a living thing can sense becomes its reality. Environment shapes design.
