DOMESTIC RABBIT

Oryctolagus cuniculus · Meadows, hedgerows, and grasslands
Grazer · Wild-range diet

3-SECOND CHECK Do I see hay — dominating the bowl?

THE RULE What they would naturally come across in their wild range, by percentage of natural diet. Nothing else.
Open meadow and hedgerow — grasses and broadleaf weeds dominate; herbs and twigs supplement.

≈90% **BASE** always visible in the bowl

≈10% **TREATS** hand-fed or scattered — never in the bowl

BASE
Grass hay
timothy, orchard, meadow

TREAT
Dandelions
leaves, stems, flowers

TREAT
Clover
red and white

TREAT
Plantain & chickweed
broadleaf weeds

TREAT
Twigs & bark
blackberry, apple, hazel

Plus other plants and prey from their wild range — pesticide-free only.

NO ICEBERG, NO CORN No iceberg lettuce, no corn, peas, beans, or starchy roots. Hay must always be visible.

HOW WE FEED

- Base must be visible in the bowl.
- Treats are hand-fed or scattered, never in the bowl.
- Baseline before guest hours — do not feed to fullness before guests arrive.
- All items pesticide- and herbicide-free.

MATCH THE BOWL — DON'T INTERPRET.

If unsure: Pause → Ask → Escalate. No substitutions without approval.

What a living thing can sense becomes its reality. Environment shapes design.
