YELLOW-FOOT TORTOISE

Chelonoidis denticulatus · Amazon basin and northern South American rainforests
Deep-rainforest omnivore · Greens-dominant · Wild-range diet

3-SECOND CHECK Do I see leafy greens + a little fruit + trace protein?

THE RULE Deep-rainforest tortoise. More greens than fruit — OPPOSITE of red-foot.
Amazon rainforest floor — herbs, leaves, flowers, occasional fallen fruit, slow invertebrates.

≈75% BASE greens, herbs, flowers, browse

≈5% TREATS animal protein, once per week only

BASE 75%
Collard, mustard
rotated daily

BASE
Mulberry leaves
wild forage

BASE
Hibiscus
wild forage

TREAT 20%
Papaya, melon
fruit — sparingly

PROTEIN 5%
Snail, earthworm
weekly only

Plus other plants and prey from their wild range — pesticide-free only.

TABOO No citrus. No dog food. No daily protein. No daily fruit (causes digestive imbalance).

HOW WE FEED

- Greens dominate the bowl. Fruit is a treat, not a staple.
- Animal protein once per week ONLY — never daily.
- Baseline before guest hours — do not feed to fullness before guests arrive.
- All items pesticide- and herbicide-free.

MATCH THE BOWL — DON'T INTERPRET.

If unsure: Pause → Ask → Escalate. No substitutions without approval.

What a living thing can sense becomes its reality. Environment shapes design.
